Herbert L. Smith (University of Pennsylvania, Philadelphia, USA)  
Vortrag: "Age-Period-Cohort Analysis: What Is It Good for?"

Mittwoch, 10.10.2018

Donnerstag, 11.10.2018

Freitag, 12.10.2018

Dienstag, 09.10., 15 Uhr, MPI, Konrad-Zuse-Str. 1: Herbert L. Smith (University of Pennsylvania, Philadelphia, USA),  
Vortrag: "Age-Period-Cohort Analysis: What Is It Good for?"

Herbert L. Smith is Professor of Sociology and Director of the Population Studies Center (2005-09, 2011-19) at the University of Pennsylvania. Formerly he was Associate Dean for the Social Sciences, School of Arts and Sciences (2002-05). He is an elected member (1991) of the Sociological Research Association and in 2002 received the Clifford C. Clogg Award from the Population Association of America for early career achievement. From 2009-13 he served as Président, Commission d'Évaluation, Institut National d'Études Démographiques (France). Current research concerns bias due to non-response in survey research, organizational change in nursing and health outcomes, and the practice of cohort analysis. Other research interests include the design of social and demographic studies, the

experimental model, causation, representation, measurement, and matching. Previous work by Professor Smith involved social stratification, including the demography of educational attainment and race differences in non-marital childbearing; the family planning system in four counties of North China; and the relationship between the status of women and fertility in five South and Southeast Asian nations (Pakistan, India, Thailand, Malaysia, Philippines). He is or has been a Principal Investigator on two NICHD R01 awards, a T32 award, and R24 and P2C awards; as well as on grants from the Rockefeller, Hewlett, Mellon, and Compton foundations.
